WORK EXPERIENCES

Software Developer

March 2025 – Present

Xtreme Offshore Outsourcing Inc.

Makati City

- Started as a Software Developer Intern and was later absorbed into a regular Software Developer role based on performance, adaptability, and contributions to ongoing projects.
- Develop and maintain web applications using ASP.NET framework, C#, VB.NET, PostgreSQL, and REST APIs, utilizing tools such as Postman and GitHub for API testing, version control, and collaboration.
- Contribute to iOS mobile application development using Xcode, Swift, and Objective-C, assisting in feature implementation, maintenance, debugging, and application improvements.
- Participate in software testing, debugging, and technical documentation to ensure application quality, functionality, and maintainability throughout the development lifecycle.
- Utilize AI productivity tools to support development workflows, improve efficiency, assist in debugging, accelerate research, and enhance overall productivity during software development tasks.

PROJECTS

SpendiTrack | Full-Stack Developer - ASP.NET Core MVC, C#, SQL Server, Git

July 2026

- Developed a full-stack personal finance web application that enables users to manage monthly budgets, allocate category budgets, and track expenses through an intuitive and responsive interface.
- Implemented secure user authentication using ASP.NET Core Identity and developed budget allocation, expense tracking, and spending analytics to help users effectively monitor their finances.
- Designed responsive Razor Views with Bootstrap and integrated transaction history, CSV export, and account management features to enhance usability and financial reporting.

PUP - FESR | Front-End Developer - Angular, DaisyUI, TailwindCSS, Git

July 2024 – December 2024

- Developed the front-end single-handedly of a web application that manages Faculty Information, Evaluation, and Research Repository, ensuring efficient data management and accessibility.
- Implemented a modernized UI aligned with current industry trends, providing a sleek, professional, and visually engaging experience.
- Focused on user-friendly navigation, making the system intuitive and accessible even for elderly and non-technical users.

HUEnique | Project Manager, Front-End Developer - Angular, DaisyUI, TailwindCSS, Git

April – July 2024

- Developed an interactive color analysis web application providing personalized style recommendations using Angular and utilizing frameworks such as DaisyUI / TailwindCSS
- Designed an eye-catching pastel-themed UI, associating colors with characters to enhance engagement.
- Ensured a user-friendly experience by simplifying processes and maintaining an intuitive interface.

Wibs Depot | Front-End Developer - HTML/CSS, Git

Oct 2023 – Jan 2024

- Developed the frontend for an e-commerce web application with shopping cart management, profile updates, and order tracking.
- Designed a clean and intuitive UI, ensuring a smooth user experience by simplifying complex processes.
- Focused on accessibility and ease of navigation to enhance user engagement.
